JOHN A. SALZER SEED CO

SALZER'S

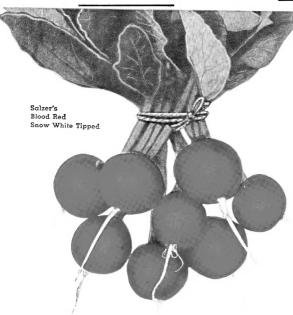

Early Bird Radish

We introduced this grand radish over 50 years ago and have been extensively developing and improving it, so get your seed from us if you want genuine, true-to-type seed. Don't take anything "just as good." Salzer's Early Bird is of globe-shape, bright scarlet color, has very short tops, flesh is pure white, fine grained, crisp, nice, spicy taste, and never becomes hollow or pithy. Averages ½ to 1 inch in diameter, according to maturity. It is alike most valuable for outdoor planting in spring or in autumn, and usually commands top prices.

Salzer's Early Bird, the incomparable radish, has produced radishes ready for the table in 12 days' time under very favorable conditions, radishes that were uniform in size and shape, uniform in maturity, with small tops and of beautiful and attractive bright red color. For the average gardener, however, one may figure about 18 days maturity. It is also one of the best strains for growing under glass.

If you are at all anxious, either as a market gardener or as a grower of Radishes for your own private table, to have Radishes from 3 to 10 days ahead of your neighbor, and if you are anxious to have the finest Radish that seed can produce, even under the most adverse circumstances, then by all means plant Salzer's Early Bird. Its crisp, brittle flavor, as well as its remarkably quick growth and fine color, alike recommend it. Not only is Salzer's Early Bird extremely early, but it also yields heavily and its quality is unsurpassed. You will agree that it is the earliest, finest and best tasting radish that is grown to-day!

975—Pkg., 12c; oz., 19c; 2 oz., 32c; 1/4 lb., 54c; 1/2 lb., 90c; lb., \$1.65, postpaid.

What Customers Say

Mr. E. J. McClellan, 1114 E. Nebraska Ave., Spokane, Wash., writes, "I think your Early Bird Radishes are the finest for the home garden that I have ever grown." Mr. L. M. Gossman, 820 N. Duluth Ave., Sioux Falls, S. D., writes, "Your Early Bird Radishes are turning out so nicely under adverse conditions, that I am ordering some more seed so I have more coming along." Mrs. Arne M. Olson, R. D. 3, Brockton, Mont., writes, "Have planted your Early Bird Radish for the past five years as it is the earliest radish I have ever grown and brings a fine profit. I sold 1800 bunches last spring and am well known in several towns for my wonderful radishes." Mrs. Louie Brimmer, R. D. 2, Box 9, Plum City, Wis., writes, "Your Early Bird gives us radishes before any one else has any." Mr. Fred Friday, Cambria, Wis., writes, "Your Early Bird Radishes were fine."

Blood Red Snow White Tipped Radish

An Exceptionally Fine Radish

The lively scarlet color points off to a pure white tip, giving it a most attractive appearance. It's perfection itself when it comes to quality and earliness! Splendid for forcing, also fine to plant as a succession variety. Radishes run uniform in both shape and size, averaging about ¾ inch in diameter. The skin is thin and tops are very short. The sparkling, snow white flesh is crisp, tender, fine grained and sweet. Does not become pithy or hollow. Matures in about 23 days.

972—Pkg., 10c; oz., 16c; 2 oz., 27c; 1/4 lb., 45c; 1/2 lb., 80c; lb., \$1.45, postpaid.

CELTUCE

The new vegetable with a new taste thrill from the interior of China! The young leaves are eaten as lettuce and the matured stalks are peeled of their tough outer skin and the heart eaten either raw, or cooked. Celtuce is truly delicious, with a taste all of its own, perhaps slightly like celery, but different and milder.

Celtuce is really a distinct species of lettuce, but grows differently and has more uses. The young leaves are used as lettuce or cooked like spinach. As a raw vegetable, the stalks are peeled and cut into five inch lengths and split lengthwise, chilled, and served like celery or raw carrots. Also delicious cooked like spiragus or in soups.

Celtuce is easy to grow. Plants quickly form a rosette of light green leaves, and in less than 90 days the stalks are solid, with a delicious casely. The

stalks are usable. The stalks are solid, with a delicate delicious pale green heart, crisp and brittle. Sow seed from early spring to July 1. Be sure to give it a trial this spring. 356——Pkg., 15c; ½ oz., Pkg., 25c; ½ oz., 65c; oz., \$1.25; ¾ lb., \$4.65; lb., \$16.00, postpaid. \$16.00, postpaid.

Salzer's Lawn Grass

Salzer's Gridiron Lawn Grass Seed Makes a Strong, Tough Sod

GRIDIRON

Build your lawn with Salzer's Gridiron Lawn Grass Mixture! Salzer's Gridiron Lawn Grass Seed is our finest mixture of various fine leaved grasses, including red top, fescues, blue grass, etc., in the right proportions, tough and strong, carefully blended to give one a strong, durable, luxurious and permanent lawn under trying circumstances. The great American game of football makes terrific demands upon the gridiron fields, and the name "Gridiron" suits this mixture admirably.

Sow one pound to every 200 square feet. It, of course, contains no timothy. 4539-1/2 lb., 35c; lb., 60c; 2 lbs., \$1.15; 5 lbs., \$2.65, postpaid. Not prepaid: 10 lbs., \$4.70; 100 lbs., \$45.00.

SPECIAL LAWN GRASS MIXTURE

Not the most expensive, nor yet the cheapest, but the best general all around and all purpose Lawn Grass Mixture that we catalog, and the most popular. In addition to a carefully blended mixture of the best grasses, blue grass, red top, etc., Salzer's Special Mixture contains the proper percentage of Dwarf White Dutch Clover, always desirable for the lawn.

Sow the seed early, as soon as frost is out of the ground, to enable the young grass to get a good start before any weeds appear. Contains no timothy. Sow one pound to 200 square feet. 4529 — 14 lb., 28c; lb., 49c; 2 lbs., 95c; 5 lbs., \$2.25, postpaid. Not prepaid: 10 lbs., \$3.90: 100 lbs., \$37.50.

RADIUM

A splendid mixture of grass seeds that produces a fine lawn. Composed of almost the same grasses as Salzer's Special but does not contain any White Dutch Clover. Contains no timothy. 1 lb. to 200 sq. ft. 4526-1/2 lb., 22c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75, postpaid. Not prepaid: 10 lbs., \$3.30; 100 lbs., \$32.00.

Salzer's Quintuplet Apple Tree is about the most practical introduction in the last decade. Red Delicious, Yellow Delicious, Jonathan, Wealthy and Yellow Transparent Apples all blossom, bud and bear their tasty apples, all on the one tree. Salzer's Quintuplet Apple yields an abundance of fruit, and makes possible growing these five different apples in the average yard, an impossibility if five different trees were to be planted. Hardy everywhere in the United States.

Surprise your friends, and yourself, with the seemingly impossible! We offer strong, thrifty trees, caliper 9/16 in. and up, three year old, 5 ft. and up, with well developed heads. Price: Each, \$1.65; 3 for \$4.65; 6 for \$8.45, prepaid by express.

effort, and naturally all shipments vital to the war are given preference. This means that all other shipments are apt to be delayed, not only freight but also express and parcel post shipments. Labor shortages, likewise, are becoming acute as our boys are being called to the colors. The war takes precedence over everything.

Therefore, we urge you to order early and further, to please allow at least one week for your order to arrive. We will ship all orders promptly but as mentioned above, there may be some delays beyond our control.

Plant a Victory garden this spring. Each individual Victory garden will increase our country's food supply and a garden will reduce one's living expenses. Sow good seed.

SALZER'S SEEDS FEED OUR ARMED FORCES

Mr. W. J. Wright, Bajo Boquete, Chiriqui, Republic of Panama, writes, "When the Panama Canal was completed in 1914, I came here to engage in gardening. I had used Salzer's Seeds before, in Texas, and trying them

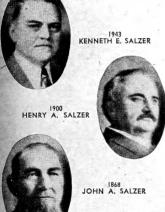

here, found they gave wonderful re-sults in Panama. Have used them steadily ever since. Cabbages, beets, and carrots are going out daily in carlots and truck loads, and the soldiers are taking all. 80% of them are from Salzer's Seeds.''

Many seed items are very short. Drastic reduction in flower seed production to meet the emergency of urgent food supplies, together with limited seed crops nécessitates early ordering. Many flower seeds will be unavailable in 1944. Please order early!

Cordially yours.

SALZER'S CLIFFWOOD EARLY WONDERWAX

The Sensation of Recent Years

Without question this is the most wonderful wax bean introduction of recent years, and the best for the market and the home garden. Belongs to the flat podded class and grows a strong plant eighteen inches high and two feet across. Plants are heavily loaded with pods five to seven inches long, flat, plump, meaty, and of a clear, handsome, waxy yellow color. Very tender, brittle, of fine texture and quality, and is the very earliest wax-podded bean. It is a bountiful yielder and bears for a long season; it is practically rustproof and it thrives and yields heavily in either a rainy season or in dry, hot weather. Appears to be absolutely unaffected by bad weather. Ready to pick in 35 days. If you have not as yet tried our New Early Wonder Wax, by all means give it a trial this season. See Page 57 for quantity prices.

SALZER'S GIANT BUSH LIMA

For Size and Flavor Has No Rival

Enormously productive and bears pods of immense size. Plants are of vigorous growth, with heavy foliage, and of true bush form, the full grown bushes measuring 30 inches in height and 24 inches across the top. Pods are frequently borne in "clusters" of from 5 to 8, are 5 to 6 inches long by 11/4 inches wide, and each one is well filled with large, thick, tender, full-size beans of melting and luscious flavor. It is very early, maturing in about 85 days. A universal favorite, because of its earliness, productiveness, size and fine flavor. Lima Beans should not be planted before the soil has warmed up and the weather is quite settled.

EDIBLE SOY BEANS

EDIBLE SOY BEANS are the food of the future: The tremendous food value of soy beans has long been known but the difficulty has been to develop a va-riety that would cook and bake soft so as to be edible.

The original seed was brought to the U. S. by Mr. Morse of the U. S. Dept. of Agriculture and was bred up and developed by Prof. Geo. M. Briggs of the University of Wisconsin and his associates. Matures in 85 days. Soy Beans are a substitute for ment; when green they are as good as fresh pens; cooked or baked, they taste like penuts. Wisconsin Hollander

The Grandest, Best Keeping, Surest Heading, Large Cabbage in the World

For over one half a century this grand cabbage has held absolute away as the undisputed leader of all late flat cabbages. So famous and well-known has it become, that it is not an uncommon occurrence for stores to give the preference to market gardeners who can furnish them with these large, solid, heavy cabbages. It is surprising how many of the retail customers insist upon purchasing only Salzer's Giant Flat Dutch Cabbages for their winter use. They know that its flavor, quality, and tenderness is unequalled by any other variety.

Always In Great Demand

On the city markets, the attractive, fine appearing heads sell themselves to thrifty purchasers. The home gardener who once plants this superb variety, finds it so far superior in every respect to any other late sort that he has ever tried, that where Salzer's Glant Flat Dutch has once gotten a foot-hold in a garden, it has never been suplanted by other varieties, but is sown year after year. Unsurpassed in quality and taste, sureness of heading, weight, size, attractiveness, far superior for sauerkraut and slaw. Once planted, always planted. Pronounced everywhere to be the greatest late flat cabbage ever introduced, and the finest of any in existence.

A Sure Header

For sureness in heading and regularity in growth, SALZER'S GIANT FLAT DUTCH certainly heads the list. Heads are 12 to 14 inches in diameter, averaging 18 to 20 pounds in weight. It forms every time, very large, very hard, solid heads, crisp, tender, sweet, uniform in shape, color and handsome appearance. It has a very short stem, is a very compact grower, forms few loose leaves, which

turn into the head and if planted closely will yield enormous crops. Reports of 999 marketable heads from 1,000 plants set out are of frequent occurrence. It keeps well until late in Spring and is good for shipping.

Price of Salzer's Giant Flat Dutch Cabbage: 250—Pkg., 15c; ½ oz., 27c; oz., 48c; 2 oz., 84c; ½ lb., \$1.59; ½ lb., \$2.95; per lb., \$5.50, postpaid.

Gives Big Results Everywhere

Mrs. C. K. Brandt, R. D. 1, Box 559, Reedley, California, writes,

"Your Giant Flat Dutch Cabbage is a wonderful variety, Head's were big and solid. We used your seeds in Southern Texas 35 years ago, and they do just as well in California."

Annie E. McMullen, Brush Valley, Pennsylvania, writes, "Your Giant Flat Dutch Cabbage is giving an excellent stand of plants. Have used this for several years."

Mr. Fred Wiggers, R. D. 2, Lincoln, Illinois, writes,

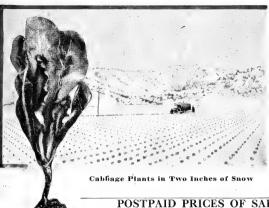

"For late cabbage, we have never found anything in the last ten years that equals Salzer's Giant Flat Dutch."

Mrs. John Corressell, R. D. 2, Mt. Vernon, Indiana, writes.

"We tried Salzer's Giant Flat Dutch Cabbage last year and were very well pleased with it."

Frost Proof Cabbage Plants

Withstand Frosts and Slight Freezes

Note: Due to the severe drouth in the South last spring, plants were not as nice as usual and could not be dug regularly, which delayed shipment of orders, We hope for normal weather this year again.

We hope for normal weather this year again. Frost Proof—That is exactly what we mean; in fact, we claim more than that. If the plants do not withstand twelve degrees below freezing (20 degrees above zero) we will either replace them or refund your money. Nor is that all, you can plant Salzer's Frost Proof Plants out in the open just as soon as you can get them into the soil. Once in the soil, the land freezing, or the plants being covered with ice, sleet or snow will do no injury, unless the temperature gets below 20 degrees above zero (frequently not then)

SPECIAL NOTICE

The plants when received may be somewhat wilted and have a stunted appearance. Regardless of ap-pearance, they will produce results superior to com-mon or home grown plants.

Be sure to state when we shall send your Cabbage Plants, otherwise we will use our own judgment. Shipping weight 25 lbs. per 1000 plants. Plants will be shipped direct from our growing station. Available from January 15 to June 15. We cannot accept orders for 25 plants of one variety.

Salzer's Independence or 4th of July Corn

Our Largest Eared, Heaviest Yielding, Extra Early Sweet Corn

Our sales of this Sweet Corn have been enormous and are increasing from year to year. Our supply, although always larger than that of the preceding year, generally has been exhausted before the end of the season. We do not hesitate to say now that more of Salzer's Independence Corn has been planted all over the country in the last few years than of any other extra early sort. Matures in 60 days.

Comparative tests made in our trial ground prove Salzer's Independence far superior in size, productiveness and delicious quality to any other first early variety; the many testimonials we have received, a few of which are printed here, show the satisfaction this corn has given wherever used.

The vigorous stalks grow about five feet high and frequently produce two fine long ears, 10 to 12 rowed, and about 10 inches long, which are very symmetrical and handsome. The grains, which are tightly set, are large, deeper than broad, very white, and are of an exquisite fine quality, usually found only in the later sorts. Quite often reports have reached us of ears of our Independence Corn having been in edible condition in 50 to 55 days from planting the seed, and if sown in the fore part of May in our section in a favorable season, luscious ears of this variety should surely be ready for the table by July the 4th.

Salzer's Independence or Fourth of July Corn, an introduction of ours of over a quarter of a century ago, yields first place to none for extreme extra-earliness, and is the earliest white sweet corn grown. It is the LARGEST EARED and HEAVIEST YIELDING EXTRA EARLY SWEET CORN, bar none. A great seller at market. Sixty days from planting one should pluck mature sweet corn, so that at your Independence Day dinner you can serve sweet, luscious, tender, finest quality corn on the cobers 10 inches and more in length, each having 10 to 12 rows, symmetrical, handsome, and with nicely rounded, rather blunt, tips.

Mr. Oscar Van Dusen, 7396 Emmett Road, Yale, Mich, writes, "I ordered your Fourth of July Sweet Corn last year and had wonderful corn." Mrs. Chris Nafziger, R. F. D. 1, Kalona, Iowa, writes, "Last year, Salzer's Fourth of July Corn gave us our first corn on June 29th. It is the best we ever had." Mr. W. H. Steinman, R. F. D. 2, North St., Quincy, Ill., writes, "As for size and earliness, there is no better sweet corn than Salzer's Fourth of July." Mr. J. D. Vogt. R. D. 2, Box 884A, Escondido, Calif., writes, "Planted your Fourth of July Sweet Corn on May 5 and picked ripe ears July S." Mr. L. O. Champe, Garnett, Kansas, writes, "I picked my first Independence or Fourth Of July Corn today, June 23. Will be sold out before the Fourth."

content, handsome, attractive, tender and juicy, Salzer's Honey Boy is popular with the market gardener, as maturing in 56 days in this northern climate, it enables him to get the first edible sweet corn to market and to reap the consequent high prices. Popular with the home gardener as it enables him to grow delicious, melting quality sweet corn for his table in an astonishingly short time.

Honey Boy Is a Desirable Extra Early Corn

Developed for a short season, it is one of the best extra Developed for a short season, it is one of the best extra early sweet corns for any district and especially for the entire Northwest. Like all extra-early varieties, the stalks are slender and grow 5½ to 6½ feet high, and the ears are about sixteen inches above the ground. Being a free stooler, it shoots up many stalks, hence is a heavy yielder. Ears are straight and uniform, handsome, nicely rounded at the tips, average 7 inches in length and contain 12 to 14 rows white, fat, plump, sweet and delicious kernels.

CUCUMBERS FOR PICKLES

SALZER'S PROLIFIC PICKLE CUCUMBER

Salzer's Prolific Pickle is the one unbeatable pickling cucumber, it is enormously productive, it is uniform, it is a splended shipper, it is early, it is of wonderfully fine quality. Housewives purchase it at market in preference to any other. Salzer's Prolific Pickle is the ideal cucumber for very early, uniform pickles.

The fruits are slender, cylindrical, with large prominent spines, color dark green. Measures about $5\frac{1}{2}x^2\frac{1}{2}$ inches, and has square ends, making it very attractive. The flesh is solid and thick in texture, and excellent in quality. The vines set fruit when young and usually continue to bear longer than any other variety. Matures in about 55 days. We recommend Salzer's Prolific Pickle as the very best of all the cucumber types for pickling.

SALZERSALAD

The Delicious Salad Plant

Salzersalad is a distinct salad plant of recent introduction, that is most delicious when used in a number of ways. The sweet and tender stalks may be cut or diced raw for salads, they may be cooked and creamed like asparagus or celery, serving them hot, the tops may be cooked and served as greens, or the entire young plants may be cooked for greens, so necessary for the physical system. Doctors tell us that plenty of "greens" are very beneficial and necessary for good health

Salzersalad was bred from Chinese or Celery cabbage and has heavily crumpled deep green leaves borne on long, thick, white, closely folded stalks, tender, sweet and delicious. It is so much superior to anything heretofore offered, that we know it will give the utmost satisfaction. Salzersalad yields heavily and over a long period, being quite slow to go to seed,

Healthful and tasty, both raw and cooked, Salzersalad has been declared the most delicious salad plant ever produced, by all who have tried it. 1050-Pkg., 15c; 2 pkgs., 28c, postpaid. Because of short crop, we can only offer packages this year.

Salzersalad-Try It This Year! Delicious, Creamed Like Asparagus or Served Raw!

Tastygreen, the wonder vegetable, is rich in protein, mineral matter, and other elements so necessary to the development and maintenance of the human system. "Greens" are highly essential to our well-being, and of these, Spinach is perhaps the most widely planted and the most widely used, although unpalatable to many.

Tastygreen, the wonder vegetable, is far superior to Spinach or any of the other greens, and has a delicious flavor all its own, slightly and agreeably pungent with a Mustard taste when served hot, and when eaten raw, the flavor somewhat resembling raw Turnips. Tastygreen has small thin roots, about two inches long, and large oblong shaped leaves, rich dark green color, with a narrow white center rib. The leaves, stem and all, are prepared for table use in the same manner as Spinach or Turnip greens. It is very prolific and bears abundantly. The plants grow quickly and are ready to use in 21 to 23 days after planting.

PYRO-BUGZOFF **GUN**

Non poisonous, does not burn foliage, kills quickly and remains effective for a long period after dusting. The convenient pack-

period after dusting. The convenient package operates in a pumping manner, emitting a small concentrated cloud of dust that effectively covers the foliage.

Pyro-Bugzoff may be used for the control of Cabbage Worms, Fireworm, Leaf Hopper, certain Aphids, Rose Chafer, Rose Slug, and Aster, Strawberry, Striped Cucumber, Asparagus, Mexican Bean and Potato beetles, and many other chewing and sucking insects. May also be used in the home to control ants, certain roaches, and fleas on dozvering the under sides as well as the upper surface of the foliage.

To use: Dust thoroughly, covering the under sides as well as the upper surface of the foliage.

LETTUCE

SALZER'S EARLIEST LETTUCE

EARLIEST CURLED OR LOOSE LEAVED LETTUCE. DELICIOUSLY CRISP AND TENDER, EASIEST TO GROW

Yields an abundant crop of attractive light green leaves, heavily curled, of remarkably crisp texture, and of the finest flavor. The quality and flavor even of the outside leaves is fully equal to if not better than the tender heart leaves of many heading varieties. Salzer's Earliest is one of the most widely planted in all sections of the country, and especially in the great West. It is such a strong grower that it thrives everywhere

It is an admirable variety for outdoor planting, especially in early spring and it is also most suitable for greenhouse forcing. It is the lettuce for planting all summer long. Extremely popular for winter markets. The lower leaves grow clear of the ground so that it rarely suffers from rot. It is an ideal shipper and will prove most profitable for the grower, whether he sows seed in a hotbed or out of doors. We consider it the best non-heading lettuce for the home garden. Salzer's Earliest Lettuce affords crisp. tender, attractive, finest quality leaves long before the heading sorts have commenced to close up.

SALZER'S PRIZEHEAD LETTUCE

Is one of the best and most reliable varieties for all-year-round cultivation. The name is a trifle misleading, as it is a around cultivation. around cultivation. The name is a trifle misleading, as it is a loose leaved or curled variety, and does not make a head. Plants form a loose cluster of leaves which are exceedingly tender, quite blistered and crumpled, sweet, crisp, and are of light brown color varying to a medium green base. Salzer's Prizehead reaches a very large size without losing its tenderness or crispness. 575—Pkg., 10c; oz., 18c; ½ lb., 54c; ½ lb., \$1.00; lb., \$1.75, postpaid.

CLIFFWOOD SUMMER HEADER LETTUCE

A superb head lettuce that we introduced in 1927, that forms solid heads despite hot weather, a thing which has hitherto been almost impossible. In tests on our Cliffwood Farms, practically every plant formed a fine, firm, solid head of butterhead lettuce of the finest flavor during the heat of summer.

The leaves are light green, crumpled, thick and tender, blanching to creamy white in the center of the head. Heads are large, about 8 to 10 inches in diameter, they have a delicious rich, buttery flavor, and they are the last to go to seed. It stands heat better than any other variety, with out wilting. 577—Pkg., 14c; oz., 32c; ½ lb., 95c; ½ lb., \$1.75; lb., \$3.35, postpaid.

IMPROVED HANSON

Exceptionally early, large globular, crisp heads which are firm and well blanched. The leaves are broad, crumpled and twisted, of light green color, never spotted or brownish. It is of very sweet flavor, and succeeds everywhere and at all times. It heads well during hot weather.

SALZER'S CRISP AS ICE

A beautiful lettuce of medium size and medium early. Salzer's Crisp As Ice is a cabbage butter head lettuce, the leaves having a rich, attractive, deep green base, and upper portion covered with dark brown, giving the plant a deep brown or bronze appearance. A cool weather variety, valuable for both early spring and fall.

Has a rich, creamy heart, and when cut open is so crisp and brittle, it was given the name "Crisp As Ice."

556—Pkg., 12c; oz., 30c; ¼ lb., 92c; ½ lb., \$1.70; lb., \$3.25, postpaid.

California Cream Butter Lettuce

CALIFORNIA CREAM BUTTER

Salzer's California Cream Butter is a cabbage, butter head type, with thick leaves, large in size, of a beautiful and attractive rich dark green, tinged and spotted with brown. Ideal for the home garden. The heart of this excellent head lettuce is a rich golden yellow and has a most agreeable and delicate buttery flavor, hence the name Cream Butter. It is of first class quality, and it forms a fine solid head under any ordinary conditions.

SALZER'S EARLIEST

RIPE MUSKMELON

Earliest of All. Our His Melon many years ago by a market gardener near La Crosse, who for the past years has always had Muskmelons from 8 to 15 days ahead of his neighbors. These Melons were of uniform size, of line shape and appearance.

pearance, yellow fleshed, extremely delicious, and sold readily in our markets from \$1.25 to \$2.00 per dozen, the profit to an acre being something enormous, as all the Melons were usually sold before other sorts came into the market.

THIS IS THE EARLIEST YELLOW-FLESHED MUSKMELON that we know of, being ready for the market in about 60 days after planting. It is of oval shape, as may be seen by the illustration, of good size, about five inches in diameter, with fairly distinct ribbing, heavily netted. The flesh is exceptionally thick, of a rich salmonyellow color, sweet, luscious and melting, and the flavor is unsurpassed by that of any other variety. The vines are robust and visorous, resisting blight to a marked degree. 606—Pkg., 10c; oz., 24c; 34 lb., 72c; 32 lb., \$1.30; lb., \$2.45, postpaid.

PRIDE OF WISCONSIN

An improvement on the Sugar Rock or Honey Rock Muskmelon. The shape, heavily netted rind and the color are the same, but the delicious orange colored flesh is thicker and meatier, and the seed cavity smaller. It should eventually replace Surar Rock. 637—Fkg., 15e; 0z., 33c; ¼ lb., 98c; ½ lb., \$1.80; lb., \$3.45, postpaid.

SALZER'S SUGAR ROCK MUSKMELON

CENTS PKG.

A Type of Muskmelon That Is Creating a Also Known as Honey Rock! Sensation!

Salzer's Sugar Rock is one of the most prolific melons on the market today. It is strikingly attractive and distinct from all other sorts. Fruits are oval, of good large size, without ribbing and heavily netted. Matures in about 80 days.

out ribbing and heavily netted. Matures in about 80 days.
Four characteristics describe this melon: productiveness, striking appearance, quality, and ability to stand shipping and handling. The flesh is deep and thick, orange color, with a sugary and luscious flavor that is unequaled today. It is so aromatic that one melon, uncut, will scent a room with its sugary odor.
The outside rind is light golden yellow overlaid with heavy gray netting, and is so tough that ripe melons may be picked and then shipped a long distance and arrive in good condition. Vines are strong and vigorous and do not show any trace of blight. 626—Pkg., 7c; oz., 23c; ¼ lb., 69c; ½ lb., \$1.23; lb., \$2.35, postpaid.

Parsnip

SALZER'S HOLLOW CROWN

Parsnips prefer very wet soil and will thrive where carrots will not grow. A freeze is required to sweeten them. For the best results, deep soil is needed.

Salzer's Hollow Crown is enormously productive, roots are 10 to 12 inches long and about 3 inches thick at the shoulder. It is rich in saccharine, has

smooth white skin, is uniform in shape, is sweet, tender, sugary. Not only of fine table quality, but very desirable for stock feeding. Also relished by horses. Matures in 130 days. 832—Pkg., 10c; oz., 23c; 2 oz., 39c; ¼ lb., 69c; ½ lb., \$1.25; lb., \$2.35, postpaid.

IMPROVED SHORT THICK

This new little parsnip makes a fine garden vegetable. The tops are very small, the roots are short and thick, about 3 inches through and about 6-7 inches long. Its short, thick character make this parsnip easier to pull than the older sorts, and it does not require such deep soil. Has a sweet, delicate flayor. 119 days. 836—Pkg., 10c; oz., 24c; 2 oz., 44c; ½ lb., 75c; ½ lb., \$1.35; lb., \$2.50, nostpaid. flavor. 119 days. lb., \$2.50, postpaid.

SALZER'S DELMONICO

See Color Illustration On Page 14 See Color Illustration On Page 14

This nationally famous strain, introduced by us, does not require such deep soil for its cultivation. It is a stump rooted variety and hence easily harvested. Roots reach a length of about 8 inches, with a thick broad shoulder, skin is smooth and white, and the fiesh is fine-grained, sweet, sugary, tender and most excellent for table use. Very early, maturing in about 115 days. It is a most prolific yielder, table use. Very early, is sweeter and more nutritious than other sorts, and is contains more saccharine, is sweeter and more nutritious than other sorts, and as it is so easily harvested, large acreages are grown for stock feeding. Thrives on almost any soil. This splendid variety surpasses every other in yield and quality. 833—Pkg., 12c; oz., 29c; 2 oz., 54c; ½ lb., 92c; ½ lb., \$1.70; lb., \$5.25, post-paid.

SALZER'S RECORD BREAKER SIX WEEKS PEAS

Mr. Edward F. Trealoff, Box 93, Elmwood. Wis.. writes. "Your Record Breaker Peas are the best we ever raised for uniformity and flavor, and were ready just 45 days after planting."

Mrs. Clyde Jones, R. D. 2, Ohio City, Ohio, writes, "I planted five pounds of Salzer's Record

Breaker Peas this spring and canned 98 quarts."
Mrs. Alvin E. Hoeft, 1203 W. Oakland Ave.,
Bloomington, Ill., writes, "Salzer's Record Breaker Peas enabled us to be the first hereabouts to have new peas."

Mr. Henry Sell, Box 262, Walnut, Iowa, writes, "I think that your Record Breaker Six Weeks Peas are the best to be had. They are very early and of elegant quality."

Salzer's Record Breaker Six Weeks is a whirlwind for quality and maturity. Sweet, luscious, melting, highest quality, wrinkled peas, ready to be picked, for table or market, in 49 days.

Pods are rich dark green color, about 3 inches long, narrow and nearly round, borne singly, containing 7 to 9 peas each. Grows about 12 inches high, vines are vigorous and hardy. The seed is slightly dented. Pods are produced in riotous profusion and are literally jammed with delicious sugary peas, that fairly "melt in your mouth." It will please you beyond all expectation. Splendid for the home gardener as well as the market gardener. Aside from our own Cliffwood Farm tests, we have the reports of many pea growers of America, who unhesitatingly say, "It is about the Earliest Wrinkled Dwarf Pea in the world." 849—2 oz. pkg., 15c; 2 pkgs., 28c; ½ lb., 35c, postpaid. Crop is very short this year. See Page 57 for quantity prices.

SALZER'S EARLY BIRD PEAS

Is a wrinkled pea, very productive, the huge pods being well packed with peas, which, although large, are of a fine quality, sweet, sugary flavor and not tough as one would expect. The pods frequently grow to seven and even eight inches in length, depending of course somewhat on the soil, and it is not unusual to find between ten and twelve peas to the pod. The lateness of Salzer's Giant Exhibition is fully offset by its productiveness and its vigorousness. It has numerous first prizes to its credit, from various fairs, which accounts for its being named Exhibition. One of the best main crop varieties.

Radish

Salzer's Earliest White

Pure white color, almost like crystal, so clear, and transparent! Matures in about 18 days. It is a highly developed strain of finest quality and produces some of the earliest radishes that can be grown.

It is of olive shape, is adapted to all soils, has a very short top unusually thin skin, never becomes woody, flesh crisp, tender, and fine spicy taste. Equally good for outdoor sowing or for growing under glass. Home gardeners, sow this and Salzer's Early Bird Radish, for the earliest, finest two radishes in your neighborhood. Market gardeners sow these two varieties and make money. Mrs. Charles E. Beadle, 414 North Second St., Marshall, Ill., writes, "Your Earliest White Radishes are extra fine. We can't do without them." Mrs. M. Yunker, Hecla, So. Dak., writes, "My friends told of a party who raised such fine early radishes, and I find they were Salzer's Earliest White Radishes.'

Tomato Salzer's Earliest

Although introduced by us many years ago Salzer's Earliest of All is still the leading extra early tomato, the earliest large-sized variety grown and we believe, as we are constantly improving it, it will hold its position and will stay on top as the Earliest of All.

With us in the North it has always been a study to produce extremely early vegetables, such as will ripen and produce perfect fruit in a short time, and in Earliest of All our efforts have been successful. Everybody who has tried it speaks of it in highest praise. Earliness in tomatoes is essential for the market grower and highly desirable for the home garden. Salzer's Earliest of All is the best extra-early so far Salzer's Earliest of All is the best extra-early so far produced; it is our very earliest strain; it is a "short season" tomato. Ripening in about 57 days, after setting out the plants, it is especially adapted to all sections of the country, which makes it so decidedly popular. Finely bred for uniformity in size, attractiveness, extra earliness, and trueness to type, Salzer Quality is nowhere better evidenced than in this fine, highly praised variety, by the productiveness, are combined with favor, meatiness, productiveness, attractiveness, and

tenderness, you should plant our Earliest of All. 11 is bound to please the most particular.

The fruits are of good size, brilliant scarlet color, nearly round, entirely smooth, and remarkably handsome. The flesh is solid, and of the finest flavor. The fruits are borne continuously in large numbers until killed by frost. They have a tough skin, firm flesh, making them good shippers and beamers. and keepers.

beauty. Mr. Acro Castle, Hucysville, Ky., won the prize of \$25.00 cash for the largest tomato grown and for the best name for this beauty. Mr. Acro Castle, Hucysville, Ky., won the prize of \$25.00 cash for the largest tomato with a weight of 4 pounds 7 ounces. Think of a monster tomato like that! Mr. I. G. Haycroft, 7 East Washington St., Kensington, Md., writes, "I grew an enormous crop of smooth large tomatoes from your Peak of Perfection, so fine that they sold readily at \$1.50 per bushel." Mr. Raymond Beck, 2012 N. Jefferson St., R. D. 3, North Topeka, Kansas, writes, "Your Peak of Perfection is without exception the best tomato I have ever grown."

Peak of Perfection is practically free from seeds. The tomatoes are of a beautiful appearance, uniformly large and smooth, with a rich dark crimson skin, meaty, and have a delicious, melting flavor. All esteem it the finest flavored tomato they have ever eaten. But, combined with this delicious flavor, is the enormous size! 90 days.

SALZER'S FROST PROOF PANSIES

Biennial. Salzer's Frost Proof Pansies are what their name implies; they successfully winter through the severe climate of this north country and bloom long after frost. For a number of years Frost Proof Pansies at our Cliffwood Farm have delightfully surprised us with the number of beautiful blossoms we pick during the cold months. The flowers themselves are very large, often measuring

The flowers themselves are very large, often measuring 3 inches across, and are produced in a beautiful variance of colors from deepest black to snow white. Mrs. Albert N. Nelson, R.D. 3, Box 6, North Branch, Minn, writes: "Your Frost Proof Pansies truly are the most beautiful and the hardfest of all Pansies I ever had." Mrs. Thomas M. Seibert, R.D. 2, Box 111, Juka, Ill., writes: "Last spring I planted a packet of your Frost Proof Pansy Seed and they wintered through fine. The flowers are larger than any I have seen at the Greenhouses."

We are able to give you varieties in straight colors as listed, or straight blended Cliffwood mixture in all colors of bronze, blue, mahogany, yellow, mauve, black, etc.

SALZER'S JUNE FLOWERING 'MUMS

Offered for the First Time In Salzer's Diamond Jubilee Year!

Salzer's June Flowering Chrysan-Salzer's June Flowering Chrysanthemums are just what their name implies.—they start flowering in June! Salzer's June 'Mums have commenced blooming with us on June 20 and have continued their extravagant display until cut down by hard frost. One lady in Biloxi, Missispipi, states that these June 'Mums started to bloom for her on May 20th and she expects to still have blooms on Christmas!

Salzer's Diamond Jubilee Year is a Salzer's Diamond Jubilee Year is a fitting year for the introduction of Salzer's June Flowering Chrysanthemums. We know of no finer advance in recent years, than in these 'Mums! They resemble Salzer's Cushion 'Mums except that they make a distinctly larger bush and that they bloom earlier and continue to bloom much longer. They develop into plants about two feet high and with a three foot spread, and produce masses of about two feet high and with a three foot spread, and produce masses of bloom. They are also hardier, having weathered through unusually severe winters. And if anything, they bloom more profusely! We consider them the most important introduction of recent years. Exceedingly fine for in front of shrubbery or for landscaping.

We offer two lovely colors in this, our Diamond Jubilee Year, as follows: Canary Dean Kay-Rich deep yellow

semi-double flowers. Pink Dean Kay-Clear deep pink semi-double flowers,

The Best Barley for Malting Purposes.

Wisconsin Barbless or Wisconsin Pedigree No. 38 Barley is a bearded variety that was originated by the Wisconsin Experiment Station by crossing a smooth awn oat from Russia with Oderbucker. It is a remarkably heavy yielder, with heavy, large and plump kernels.

yielder, with heavy, large and plump kernels. The greatest feature of all, however, is the freedom from the troublesome awns in the heards. The smooth beards of Wisconsin Barbless Burley make it ensier to handle and makes both the straw and the grain more valuable for feeding. It is six rowed, has very stiff straw and is resistant to disease. It is a big improvement over the rough bearded barleys. Resistant to stripe disease. Sow 1½ to 2 bu, per acre.

A Field of Salzer's Medium Red Clover

CLOVER MEDIUM RED

Medium Red, the most important clover, lives two years or more, grows about two feet high and makes two crops a year, yielding about three tons of cured hay per acre. Clover hay is very nutritious, stock fed on it requiring less grain. Does well on a great variety of soils, thriving luxuriantly on strong, well drained loams. It is the best for crop rotations and increases succeeding crops from 25 to 60%. Sow 15 lbs, per acre. Our Radium Brand Clover is among the finest obtainable. It is our best grade, and tests around 99% in purity; the most of it is 99½% or better, and it is free from noxious weeds. Our Superior Brand tests about as high, free from noxious weeds, but it is not quite as fancy in appearance. Wisconsin, Minnesota, and Idaho grown. Bags free.

WHITE CROSS OR WISCONSIN PEDIGREE No. 19—A high yielding extra early white oat, with a taller straw and a larger kernel than is usually found in early oats. The tall straw is desirable in localities where the soil is light. A good rust-resister. Has a tendency to lodge on rich soils, but is well adapted to sandy soils, 4625—Prices above,

STATE'S PRIDE OR WISCONSIN PEDIGREE No. 7—Earliest yellow oat. In spite of unfavorable weather, State's Pride yielded 75.7 bushels per acre. Earliest of all yellow oats and best as a nurse crop and escapes rust, because of its earliness. Does not lodge easily, but fills out the kernels if it does, making it especially desirable for rich soils. Has a very short, stiff straw. It is a yellow oat, bright, thin hulled, meaty and is about the best oat. 4623—See prices above.

WISCONSIN PEDIGREE No. 1—wisconsin Wonder. This fine white variety stands up better than any other out, on rich river bottom land where other varieties usually lodge. Its coarse, stiff straw permits it to stand up well on rich manured land. Especially recommended for following cultivated crops. The kernels are white, rather long, with a medium hull. Heavy yielder. Early. 4620—See prices above.

60-DAY, JULY OR KHERSON—It is a small, yellowish oat with a very thin hull and practically all meat, and with short, stiff straw. Does not lodge easily. Sixty Day Oats are extremely early and are especially fine in a dry season. They usually yield 70 to 80 bushels per acre, at least. It adapts itself readily to the different soils. Matures in about 80 days, rather than 60 as the name indicates. 4616—See prices above.

SWEDISH SELECT OR WIS. PEDIGREE No. 5—A splendid late white oat for upland soils and poor land. The kernel is large and plump. Straw grows tall and rank and the panicles are large and well filled. It is a late maturing variety. Rust resistant and not easily susceptible to smut. Adapted to the lighter soils which are less liable to cause lodging. 4621—See prices above.

SALZER'S SILVERMINE

This variety is reputed for its heavy yields and is a fine second early white oat, very robust and vigorous and seldom lodges. The heads are borne low on strong, stiff straw which is unusually bright and clean. The kernels are white, plump, heavy and thin hulled. Endures extremes of dry, wet, hot and cold weather. 4615—Lb., 25c; peck, 88c, postpaid to 4th zone. Not prepaid: Peck, 59c; ½ bu., 79c; bu. Especially Valuable for Silo and for Feeding Green-A Substitute For Corn Fodder

Green Feed on August 1st

Salzer's Billion Dollar Grass furnishes a heavy amount of desirable green feed during August! Sown about the end of May, the fodder will be ready to cut about August 1st or a little earlier! Begin to cut it before it blossoms and continue to cut for about 12 days or until the stems toughen. By making a second seeding about June 10 and a third about June 25, abundant green feed may be had during all of August and with later seedings,

of August and with later seedings, into September!
Salzer's Billion Dollar Grass gives a heavy yield of green fodder, from 12 to 18 tons per acre on naturally moisture-retentive land in good condition, but heavier yields of up to 35 tons per acre have been reported. Yields anywhere up to 60 bushel of seed per acre (35 lbs. per but), alternative per heavy been green have been founded and it yields from 3 to 6 tons of hay per acre.

A Quick Producer

Salzer's Billion Dollar Grass produces green feed, and plenty of it, in about nine or ten weeks and attains the height of the produces of the soll. It is the one grass to seven feet according to the richness of the soll. It is the one grass to sow if you want plenty of green feed to sow if you want plenty of green feed forming August and September for your cattle, horses, sheep, hogs and poultry. Up to 90 bushel (3.150 lbs.) of seed per acre! Hogs, poultry, geese and turkeys relish the green feed and thrive and fatten if fed the seed during the fall and winter months.

fatten if fed the seed during the fall and winter months.

By cutting as soon as the plants come into bloom, a second crop may often be had and the yield of forase materially increased. When grown for seed, it gives only the one crop and sometimes some pasture thereafter.

Salzer's Billion Dollar Grass gives 3 to tone box was a factor box to a fact

Salzer's Billion Dollar Grass gives 3 to 6 tone hay per acre but as it is rather coarse and succulent it is difficult to cure for hay and we do not recommend it for that purpose. Since it is difficult to dry, the hay may become musty and so one camot depend upon a larke amount of dry hay. However, if the weather allows several extra hay days to follow one another, it is successfully cured in small cocks as clover is often cured. Where It Grows

It grows best on a soil that is rather relentive of moisture and quite rich. It luxuriates on a low, rich, moist situation but it also does well on higher ground, when it is sown on retentive soil, it endures drought fairly well. On the rich soils of the West and Northwest where there is sufficient moisture, or where there is irrigation, it yields heavily and it has given good yields on the alkali soil

so common in parts of the West. In the Mississippi Valley, it yields abundantly.

It Is Productive

Under average conditions of moisture and fertility of the soil, Salzer's Billion Dollar Grass is one of the most productive of the annual hay grasses. Think of yields of up to 20 tons of fresh green feed per acre, up to 6 tons of cured hay per acre, or up to 3.000 peunds of seed per acre! Its biggest and its greatists shallow. its silage.

Our seed is grown in the fertile Eagle Valley and Red River Valley of Northern Minnesota, two districts which have not as yet been surpassed for quality seed. Prices should not be been surpassed for quality seed. Prices should not be judged by the price of eating potatoes. Our potatoes are grown primarily for seed purposes and all of them are U.S. Gov't. Grade No. 1. We believe you will be well pleased with them. U.S. Grade No. 1 requires that the potatoes be practically free from scab, blight, dry rot and damage caused by disease, and be graded to a minimum size of 1½ inches. 60 lbs, in one bushel.

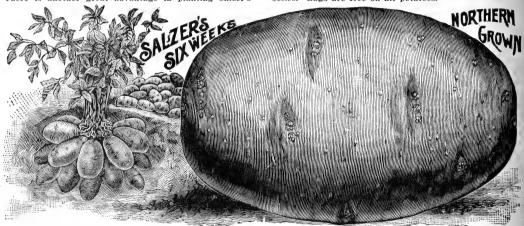

Salzer's Early Six Weeks stands alone as the great earlyest eneral purpose Potatol: It is ahead of Salzer's Earliest in quality and yield, although not quite so early, but is 10 days earlier than the famous Early Ohio Potato.

There is another great advantage in planting Salzer's

Early Six Weeks Potatoes and that is that it has never failed to produce a good crop of extremely early, very large tubers.

Harvesting Salzer's Red River Ohios

CHIPPEWA

A superb late potato introduced by the U. S. Dept. of Agriculture, which has yielded 444 bushels per acre. It is of outstanding merit for the northern states and most valuable for other sections. It is oblong in shape, has smooth white skin, shallow eyes, and sparkling white flesh that cooks up dry and mealy. Excellent for baking.

Wherever tried, Chippewa has leaped into prominence, because of its immense yield and its excellent quality. Chippewa shows high resistance to mild mosaic disease, and in tests has out-yielded such other potatoes as Katahdin, Green Mountain, Cobblers, and Rural New Yorker. Matures earlier than the other late potatoes. U. S. No. 1: Lb., 28c, postpaid to 4th zone. Not prepaid: Peck, 92c: ½ bu., \$1.43; bu. (60 lbs.), \$2.50; 100 lbs., \$4.10; 500 lbs., \$19.95. SALZER'S PLANT DEPARTMENT

TIME OF SHIPMENT

All plants are shipped when stock is ready and when the weather permits planting. For the south, orders are naturally filled much earlier than for the northern states. As orders are received, we book them and ship at planting time unless you instruct us otherwise.

Because of packing expense, orders for plants, bulbs and shrubs must be \$1.00 or more. Add 10c per plant extra for each plant wanted in paper pot and soil.

We will replace at half price any plants, shrubs, roots or bulbs that we send out, that do not grow! Since we cannot supervise the planting, watering, and general care of plants, shrubs, bulbs and roots, this arrangement is very fair to our customers. All claims, therefore, must be made within three days of receipt Otherwise, it is 'understood that replaceof plants. ments will be at half price. Plants Are Postpaid.
